

FIG. 1 is a block diagram of a system 100. The system 100 includes a host 102 and a client 104. The host 102 includes a system server 108, a group management server 120, and a transmitter 110. The client 104 includes a receiver 130, an RX controller 132, a processor 140, and an output device 144. The host 102 is connected to the client 104 via a communication link 106. The client 104 is also connected to an output device 144. The host 102 includes a client profile 112 and a client-group membership 122. The client 104 includes a membership file 138, a client ID 136, and main memory 142.
